Full Stack Developer

Full-Stack Developer specializing in React, Next.js, and Laravel, with hands-on experience building end-to-end web applications and SaaS-style systems. Developed multiple full-stack projects, including a school management platform with a relational database of 10+ entities and role-based access control. Strong in REST API development, database design, and performance-focused, responsive user interfaces.

SKILLS

Languages: JavaScript, TypeScript, PHP, Python, SQL

Frontend: React.js, Next.js, HTML5, CSS3, TailwindCSS, Responsive Design

Backend: Node.js, Laravel, API Development, Authentication (Bcrypt/JWT).

Databases: PostgreSQL, MySQL, MongoDB, Database Design

DevOps & Tools: Git, Docker, CI/CD, GitHub, Postman

PROJECTS

School Management SaaS Platform (Morocco-focused) | Laravel, Next.js, MySQL

- Built a full-stack SaaS platform for school management using Laravel, Next.js, and MySQL, supporting multiple user roles (students, teachers, administrators)
- Designed and implemented a relational database schema (10+ entities) covering academic data, attendance tracking, and payment management
- Developed secure authentication and role-based access control (RBAC) system with RESTful APIs for core school workflows
- Implemented reporting and financial tracking features to streamline administrative operations
- Optimized landing page performance and SEO, achieving a 90+ Lighthouse score and improved load speed

Client Scope & Change Order System | Next.js, Laravel, PostgreSQL

- Built a system integrating AI APIs to convert client messages into structured project requirements
- Developed AI parsing layer to extract requirements and generate pricing and time estimates
- Implemented workflow system for proposal approval (accept/reject) with automated email generation
- Built request tracking system with notifications and status management
- Optimized landing page performance and SEO, achieving a 90+ Lighthouse score

AI-to-Kanban Workflow Tool | Next.js

- Built an AI-to-workflow tool converting structured AI output into interactive Kanban boards
- Designed a JSON parsing system to transform AI responses into actionable task workflows
- Implemented drag-and-drop functionality with persistent local storage
- Focused on responsive UI and smooth real-time task interaction

Movie Management App | React.js, Supabase

- Built a React-based movie management application with authentication and user profiles using Supabase
- Integrated external movie API with search, filtering, and responsive UI
- Optimized search performance using debouncing, reducing unnecessary API calls by ~60%
- Implemented caching and lazy loading to improve application performance and user experience

EDUCATION

Specialized Technician in Computer Science

ESET, Marrakesh • 10/2024 - 09/2026

Relevant Coursework: Full-Stack Web Development, Python, Databases, Algorithms, Computer Networks

Baccalaureate in Physics & Chemistry

Almoohdin High School, Marrakesh • 10/2022 - 07/2023
